SUNREEF 80 ECO

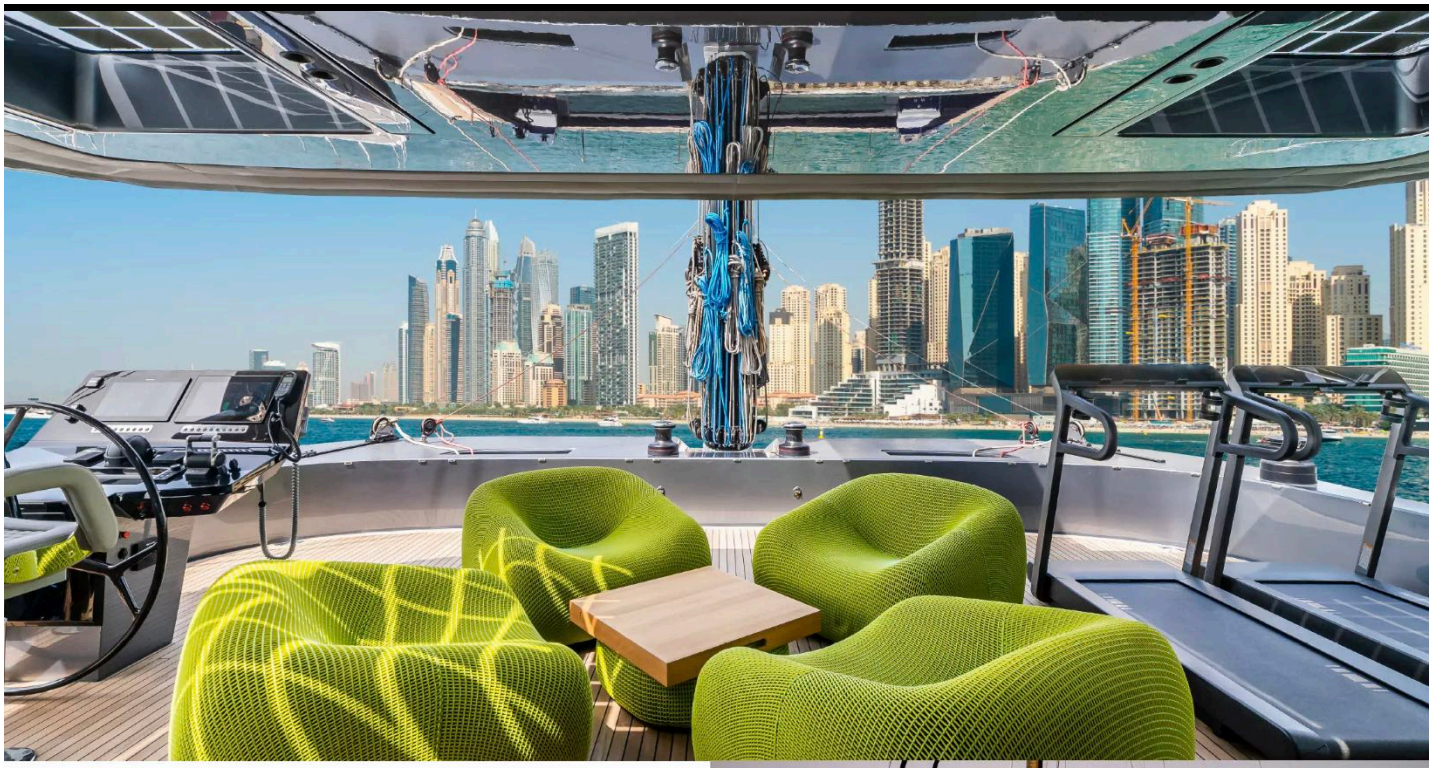
GREEN YACHTING REVOLUTION

The all-electric Sunreef 80 Eco is a fully-autonomous craft using revolutionary green tech for fuel-free cruising in total silence and luxury. Designed and built to navigate in complete harmony with the elements, the Sunreef 80 Eco is a pioneer in the world of responsible yachting.

Solar Power Redefined

Unique in the industry, the Sunreef 80 Eco's solar power system features ultralight composite-integrated solar panels within the hull sides, mast, superstructure and bimini roof. This patented system was entirely engineered and produced by the Sunreef Yachts shipyard and offers the best efficiency in the marine world.

"We take a great step forward with this truly pioneering yacht. Renewable energy is the key element in the design of the Sunreef 80 Eco. Thanks to a revolutionary solar power system, hydro-generation and performance sails, the Sunreef 80 Eco provides full autonomy, relying on the sun, water and wind." says Francis Lapp, Sunreef Yachts Founder and President



Generating Energy Under Sail

The Sunreef 80 Eco's sail wardrobe includes a 200m² main sail, 155m² Genoa, 340m² gennaker and 70m² staysail. While under sail, the Sunreef 80 Eco recovers energy from the passive motion of the two propellers thanks to an advanced hydro generation system. The energy obtained is used to power both the electric propulsion and house appliances.

Green Hi-Tech

Below the main deck, the yacht's battery bank consists of custom-engineered batteries combining light weight with outstanding efficiency. The Sunreef 80 Eco's air conditioning is the lightest and most efficient in the marine industry.

Next Level Luxury

The Sunreef 80 Eco can welcome up to eight guests on board. The catamaran's starboard hull houses an opulent and light-filled master suite, fitted with a double bed, a walk-in dressing, a pop-up TV, sofa and vanity desk. The generous ensuite bathroom follows the contemporary style of the master stateroom.

The custom layout also includes a large VIP cabin in the middle section of the portside hull as well as two identical guest cabins in the bow portion of each hull. Portside off the main deck, the yacht's galley provides plenty of storage options and is fully-equipped with restaurant quality amenities.

The main deck saloon offers lots of lounging and dining space with two oversized settees and a convertible table amidships. Towards the bow, the Sunreef 80 Eco features a fully-equipped bar with a piano and pop-up TV.

The catamaran's flybridge boasts impressive lounging areas, big sunpads and a wet bar. Inside the aft cockpit, guests enjoy a full-beam relaxation space with a large daybed, a dining table and swim platform.

SUPER CATAMARANS ON THE RISE:

TWO SUNREEF 100 ECO COMMISSIONED

Sunreef Yachts was recently commissioned to build two Sunreef 100 Eco superyachts. Both of these catamarans were ordered by repeated customers.

With a growing interest in large eco-responsible catamarans worldwide, Sunreef Yachts pioneers a sustainable revolution in the superyacht world.

The Sunreef 100 Eco was designed to provide an emissions-free cruising experience in complete silence and luxury. Using green hi-tech solutions developed in-house by Sunreef Yachts, both Sunreef 100 Eco catamarans will feature composite integrated solar panels, maximizing solar power generation.

A CONFIDENT CRUISER

With custom-engineered batteries and state-of-the-art electric engines, the Sunreef 100 Eco will offer hours of e-motoring with no fumes or vibrations. The Sunreef 100 Eco will offer a smooth sailing experience and while under sail, the yacht's hydro-generators will provide a steady supply of green energy.

A PRIVATE OCEAN LOUNGE

One of the catamaran's standout features is her invisible aft garage that can stow a jet ski and a collection of water toys. Another key feature of the Sunreef 100 Eco is her vast Ocean Lounge combining the aft platform and fold-down balconies. Dedicated to sunning, lounging and watersports, the lounge provides direct access to voluminous toy storage and diving gear.
